

INSURANCE BI ANALYTICS REPORT

Understanding 'Customer Behavior', 'Sales Channels' & 'Revenue Trends' to drive smarter business decisions

Brief about Shield Insurance Ltd.

- SHIELD Insurance Ltd. is one of the top emerging insurance companies in India. With offices and sub-offices across India, its head office is located in NEW DELHI.
- SHIELD Insurance Ltd. provides affordable & customizable insurance solutions tailored for each individual across all age groups.
- With a presence in Mumbai, Chennai, Delhi NCR, Hyderabad, and Indore, the company operates through offline agents, direct sales teams, a mobile app, and a website.

Problem Statement

- Shield Insurance currently lacks a consolidated & interactive view to effectively track revenue performance, monitor customer growth, variation in customer behaviour across age groups, cities, sales mode, and policies.
- This makes it difficult for stakeholders to identify key trends, evaluate sales performance, demographic impacts, and thereby be unable to take key business and policy decisions.

Solution:

- So, we have developed a '*Shield Insurance*' reporting dashboard for an end-to-end analytics solution designed to track and analyse 'Revenue growth', 'Customer behaviour', 'Sales performance', and 'Age-wise' distribution.

Project Objectives

- Track '**Total Customers**' and '**Total Revenue**'
- Monitor **daily & month-over-month** growth trends of 'Customers' and 'Revenue'.
- Analyze and filter performance across **Cities, Months, Sales mode, Policy ID, and Age group**
- Identify high-value customer segments & effective sales channels
- Understand age-group-wise revenue contribution & expected settlement exposure

Major Key Terms

Base Coverage Amount:

The maximum money the insurance company promises to pay you.

Premium (Monthly / Yearly):

A small amount you pay regularly to keep the account (or) the policy active. And that'll give you a lump sum amount with interest once the tenure ends.

Claim:

Customers can claim the amount (or a portion of the amount) whenever they need, in case of an emergency – Accident, Education, Healthcare, etc.

Settlement Amount:

The insurance company checks compliance and issues the final settlement (i.e., the actual amount the customer receives in hand) once the policy ends.

Settlement Percentage (Claim Settlement Ratio):

It is the percentage of claims an insurer has settled out of the total claims received during a defined period.
